-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 4, 7-9, 12, 15, and 16-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Robisch et al.

Robisch et al. disclose a rotary atomizer for a coating material applicator, the atomizer comprising a rotating element 17 having a longitudinal opening 29 therethrough, a bell cup 14 connected to the rotating element for rotation therewith as recited and including an inner surface being open to the longitudinal opening in the rotating element, a fluid conduit 19 in flow communication with the longitudinal opening 29, and a flow enhancing formation defined in the longitudinal opening as recited. Robisch et al. do not disclose a cleaning fluid conduit, however, conduit 19 is capable of functioning as a cleaning fluid conduit since Robisch et al. disclose that conduit is for coupling to a source of paint or other liquid, and it is known in the art that cleaning fluid is used to clean paint passages before changing the paint to be atomized. Robisch et al. also disclose an orifice 44 behind the bell cup directed at the outer surface which is disclosed as a paint pattern shaping orifice, however, the air flow can also clean the outer surface of the bell cup.

Allowable Subject Matter

Art Unit: 3752

3. Claims 2, 3, 5, 6, 10, 11, 13, and 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Weinstein is pertinent to Applicant's invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Davis D. Hwu whose telephone number is 571-272-4904.
